ETA Transit Systems Launches www.etatransit.com

FOR IMMEDIATE RELEASE

Florida, Colorado – ETA Transit Systems has launched a significant upgrade to its website, www.etatransit.com, a website devoted to promoting and informing those in the transit industry about ETA's expansive, scalable Intelligent Transit System (ITS) solutions on June 9, 2014.

ETAttransit.com provides an engaging and immersive presentation of its products that clearly defines its position as the 'value leader in complete transit systems. With rich graphics, easy-to-use navigation, and in-depth exploration its products, the new ETAttransit.com serves as a definitive resource for customers seeking modern transit systems that grow and adapt with the demands of a rapidly changing landscape.

Since 2003, ETA Transit Systems' revolutionary open architecture system, SPOT (Spatial Positioning On Transit), has improved transit performance, provided real-time updates, and increased rider satisfaction. SPOT delivers an innovative and scalable set of solutions that grows with its customers as their needs evolve, ensuring an affordable, yet extremely responsive solution that consistently delivers across-the-board system reliability and process improvements.

"This new website reinforces ETA's position as the value leader in modern transit systems," says ETA President, John Maglio. "ETAttransit.com does an excellent job at highlighting the vast array of solutions, experience, and fanatical customer service that quite frankly, our competition simply cannot deliver."

Since 2003, ETA Transit Systems has delivered Intelligent Transit Systems technology to small to medium-sized transit agencies and university shuttle operations. With offices in both Florida and Colorado, ETA is positioned to deliver responsive GPS tracking, fixed route and paratransit dispatch software, smartphone apps, SMS messaging, mobile surveillance, automatic passenger counting, and passenger information display systems to locations all across the country.
