

THE SPOT® BASE INTELLIGENT TRANSIT

A solid foundation for transit.

More standard features and capabilities out of the box.

Base system includes:

- ▶ Administrative console
- ▶ Mapping capabilities
- ▶ Mobile data terminals
- ▶ Public website & mobile apps
- ▶ Reporting module
- ▶ Service messaging
- ▶ Station content functionality
- ▶ Route/schedule management
- ▶ 2-way driver messaging
- ▶ System configuration tools
- ▶ Fare counting

Why is SPOT® the right-sized fit for your transit agency?

- ▶ Provides core functionality that impacts every aspect of your operations
- ▶ Improves operational awareness with automatic vehicle location
- ▶ Monitor on-time performance, passenger loads, and timing
- ▶ Create detours, schedules, and modify route information
- ▶ Improve safety with real-time information about speeding, unsafe driving, and excessive idling
- ▶ Automatically collects key transit data and provides the reporting tools for information review and analysis
- ▶ Import and export GTFS data to power trip planners and seamlessly integrate your travel information with other transit systems
- ▶ Open architecture, web standards-based solution for easy integration with off-the-shelf hardware
- ▶ Cloud-based platform for instant, real-time access from any Internet-connected device
- ▶ Lower long-term cost of ownership
- ▶ Easy upgrade path to advanced features such as on-board announcements, video surveillance, infotainment, digital displays, video surveillance, mobility, and more

Climb on board with the value leader in **complete** transit systems.
