

INTELLIGENT TRANSIT SYSTEMS

SPOT[®] ♥ open architecture

Realize incredible efficiency, cost-savings, flexibility, and performance with an open architecture ITS.

Open architecture approach unifies transit systems:

Hardware

Software

Mobile applications

Display systems

Let's be honest. The days of the proprietary intelligent transit system are over. There, we said it. Open architecture systems are the heir to the throne, and perched atop this wonderful engineering platform is the SPOT ITS. With its web-based standards, open API, and modular design, transit agencies realize a plethora of tangible benefits:

- ▶ Ease of expansion and integration with all types of hardware and software
- ▶ Minimal upkeep with no hardware or software to maintain
- ▶ Universal access through any Internet-connected device
- ▶ GTFS standard adherence for truly interconnected systems (between vendors and neighboring agencies) and multi-modal trip planning
- ▶ Easy implementation with minimal hardware and configuration time
- ▶ Budget-friendly with off-the-shelf hardware and virtual software means less procurement time, as well as smaller adoption and operating costs
- ▶ Incredible development options—we provide you with the access to the same tools we use to develop our system so that you have unparalleled access to create your own SPOT-compatible solutions.

Climb on board with the value leader in **complete** transit systems.
