A cloud-based ITS

Enjoy increased stability, security, cost-savings and accessibility when you connect to the cloud.

Unite your entire agency!

Administration tools

Mobile data terminals

Digital displays

Public websites and apps

Imagine a future where you can access the entirety of your transit operations from any Internet-connected device. All the planning, reporting, scheduling, and communication tasks powered by a single interface that unifies hardware, software, vehicle and human elements into a single, powerful tool. Your new transit system will quite literally move at the speed of light.

ETA Transit's SPOT® intelligent transit system brings all this potential to life through the power of cloud-based computing.

- ▶ Lower adoption costs and long-term cost of ownership
- ▶ Non-proprietary hardware and modern web standards
- ▶ Rapid system upgrade and update pathways
- ▶ Secure, fault-tolerant regional servers powered by Amazon Web Services®
- ▶ Unparalleled accessibility from any Internet-connected device
- ▶ Comprehensive suite of tools including: reporting, messaging, scheduling, infotainment, announcements, passenger counting, mobility, and more
- ▶ Simple, intuitive interface
- ▶ Faster, more efficient operations for your agency and staff

Climb on board with the value leader in **complete** transit systems.
